HELPING YOU DO YOUR BEST WORK

HOW TO RECOGNIZE A CYBERATTACK

WHY IS YOUR BUSINESS AT RISK?

Did you know that 60% of all targeted attacks are aimed at small to medium-sized businesses? What's worse? A reported 60% of small businesses close their doors following a cyberattack. Some additional reasons why attacks happen to small to medium-sized businesses:

- Less stringent security measures.
- Lack of an incident response plan (IRP).
- Lack of means to defend/recover from attacks.

5 AREAS OF YOUR BUSINESS THAT COULD BE COMPROMISED

- 01 Emails (phishing)
- 02 Files (ransomware)
- 03 Network (man-in-the-middle)
- 04 System accounts (social engineering)
- 05 Cloud storage (man-in-the-cloud)

WHAT TO DO

YOU MUST BE PROACTIVE

Review emerging threats, new tools and new ideas, updating everything frequently.

Learn as much as possible about cybersecurity, get certified, and ask for training at the workplace.

YOU MUST BE SENSIBLE

Develop simple procedures to minimize your exposure to cyberattacks.

Never click on links, download files or open attachments in emails (or on social media) that aren't from a known, trusted source.

YOU MUST BE VIGILANT

Cultivate a culture of cyberawareness to help employees understand the risks.

Every situation you come across could be a potential scam. It's better to be safe than sorry. If you see something, SAY SOMETHING.
